Response to Arguments

1. In view of the appeal brief filed on September 26th, 2003, PROSECUTION IS HEREBY REOPENED. An action is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. Applicant's arguments, see paper no 44, filed September 26, 2003, with respect to the rejection(s) of claim(s) 1, 3-5, 56-60 and 96 under U.S.C 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of new found art.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-5, 7-15, 56-60 and 96 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hind et al. (Hind hereinafter: US PAT. 5,987,523) in view of Takashi et al. (Takahashi hereinafter: US PAT. 4,823,373).

Hind discloses a system having an object oriented protocol (i.e., "a software application resident on a separate programmable device that communicates with Web server through the Internet"), at least one web server (402), at least one dispatch server (407), and a plurality of system resources (205) having a network manager (redirector 204). Hind further discloses the network manager having the claimed functions (figs 1, 2, 3). Hind further disclosed that (a) the web server is a secure web server, (b) the protocol for enabling encrypted interactive communications, (c) the secure web server for managing secure customer sessions, and (d) switched communications including switched voice traffic resources and switched data traffic resources (see figs 1-3). Hind et al fail to teach the use of switched voice traffic resources and switched data traffic resources including switched toll free voice traffic resources for a new network management system. However, Takahashi et al teach the use of switched voice traffic resources and switched data traffic resources including switched toll free voice traffic resources for a new network management system (see abstract, summary of the invention). Thus, it would have been obvious to one of ordinary skill in the art to modify the system of Hind by adopting the teaching of Takahashi et al to improve the system of Hind. Still further, the system of Hind modified by adopting the teaching of Tahahashi et al would have the claimed network manager.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Firmin Backer whose telephone number is (703) 305-0624. The examiner can normally be reached on Mon-Thu 8:30-6:00.
